Your nominated contractor is:

P S Innovative Heating Solutions Ltd

Description	
Boiler make and model	ecoTEC plus 832 Combi
Flue type	Horizontal flue with appropriate fittings
Controls	None required
Condensate	Run pipe to suitable position as per regulations
Filter type	Vaillant Advance Filter
Boiler guarantee	10 years for parts and labour - subject to annual servicing
Notes	<p>The existing boiler is a non condensate boiler and currently does not conform due to no sufficient access to maintain and too low. Therefore must be moved to a different location which is above the kitchen worktop on the adjacent wall.</p> <p>Customer is aware that a joiner must remove the existing two base units to remove the boiler and to reconfigure/extend the existing pipework to the new boiler position</p> <p>Supply & install 22m copper pipework to reconfigure/extend the primary flow & return, hot & cold water, plus the gas supply</p> <p>Also, relocate the fused spur and Supply & install a new Hive device</p> <p>Make good the existing flue opening</p> <p>Add inhibitor</p> <p>The installation charge does not include the joiners charge to remove the kitchen units prior installation and then return post installation to fix them back in situ.</p>

Services must be carried out by either a Vaillant or other local Gas Safe Registered engineer at 12 monthly intervals; the cost of which is not included in this quotation

Standard installation requirements included:	
* Removal and disposal of existing boiler(s) and redundant materials.	Subtotal £3,283.33
