Notes	

Services must be carried out by either a Vaillant or other local Gas Safe Registered engineer at 12 monthly intervals; the cost of which is not included in this quotation

Standard installation requirements included:

- * Removal and disposal of existing boiler/s and redundant materials.
- * Removal of packaging for disposal/recycling.
- * Alterations to existing system to facilitate new installation.
- * Commissioning of appliance and completion of manufacturers Benchmark documentation.
- * Instruction on use of new controls and registration (where appropriate).
- * Please note that Vaillant shall not be responsible or liable for products purchased from a third party (not directly from Vaillant) i.e. controllers
- * Registration of new appliance with the Gas Safe Register/building control.

Subtotal	£3,041.67
VAT rate	20%
VAT	£608.33
Total	£3,650.00

- * Please note if you accept this quote you will become subject to our boiler replacement terms (Current version attached to covering email)
- * If you have agreed to become part of our connectivity trial (if so this will be indicated in notes section above) you will also be subject to our connectivity trial terms (Current version attached to covering email)
- * No responsibility can be accepted for problems on existing electrics, water or gas supply pipe work.
- * Extra charges may apply in the event that the gas pressure on the new boiler is insufficient.
- * If our installer discovers asbestos materials on site the cost of removal will be the responsibility of the customer.
- * Some redecoration may be necessary due to changes made as part of the installation.
- * This quotation is valid for 3 months from the date above.
- * Finance is available subject to status; agreements must be in place prior to installation.
- * Please note this is not a VAT invoice.
